

The ET4080 is a industrial flat panel display for rugged conditions.

The ET4080 rugged flat panel display, a companion product to the ET4580 industrial PC, has a stylish heavy-duty metal and safety glass face plate that is sealed to IP66. The unit is fitted with an 18 inch colour TFT display. A smaller unit with a 15 inch display - the ET4050 is also available.

The ET4080 is available with an optional touchscreen, the Infra-T touchscreen, which is suited to gloved-hand operation. Other touch screens are available on request. Further options include a stainless steel face plate or a high-brightness screen, suitable where a sunlight readable display is required.

The ET4080 is available in standard panel mount and is particularly suited to industrial applications. It is ideal for those really tough conditions where plastic will not do the job, such as foundries, food manufacturing, smelters, steelworks and public access. It is competitively priced and requires little maintenance.

The ET4080 is designed and manufactured in Australia by APC Technology.

FEATURES

- BIG COLOUR DISPLAY
- SEALED FACE PLATE
- STYLISH AND RUGGED
- LOW MAINTENANCE
- OPTIONAL TOUCHSCREEN
- COMPETITIVE PRICE
- AUSTRALIAN DESIGNED AND MANUFACTURED

"ET4080 - a Industrial Display for Rugged Conditions"
